## EN QUELQUES MOTS...

Après 10 années de recherche dans les arts verriers, la société Bertron Création s'est implantée en Bretagne en 2002.

En 2008, la société a déposé un brevet d'invention sur le procédé d'inclusion de métaux dans le verre par fusion.

En 2010, ce procédé unique est devenu une marque déposée : KOPPER GLASS®.

MIROIRS

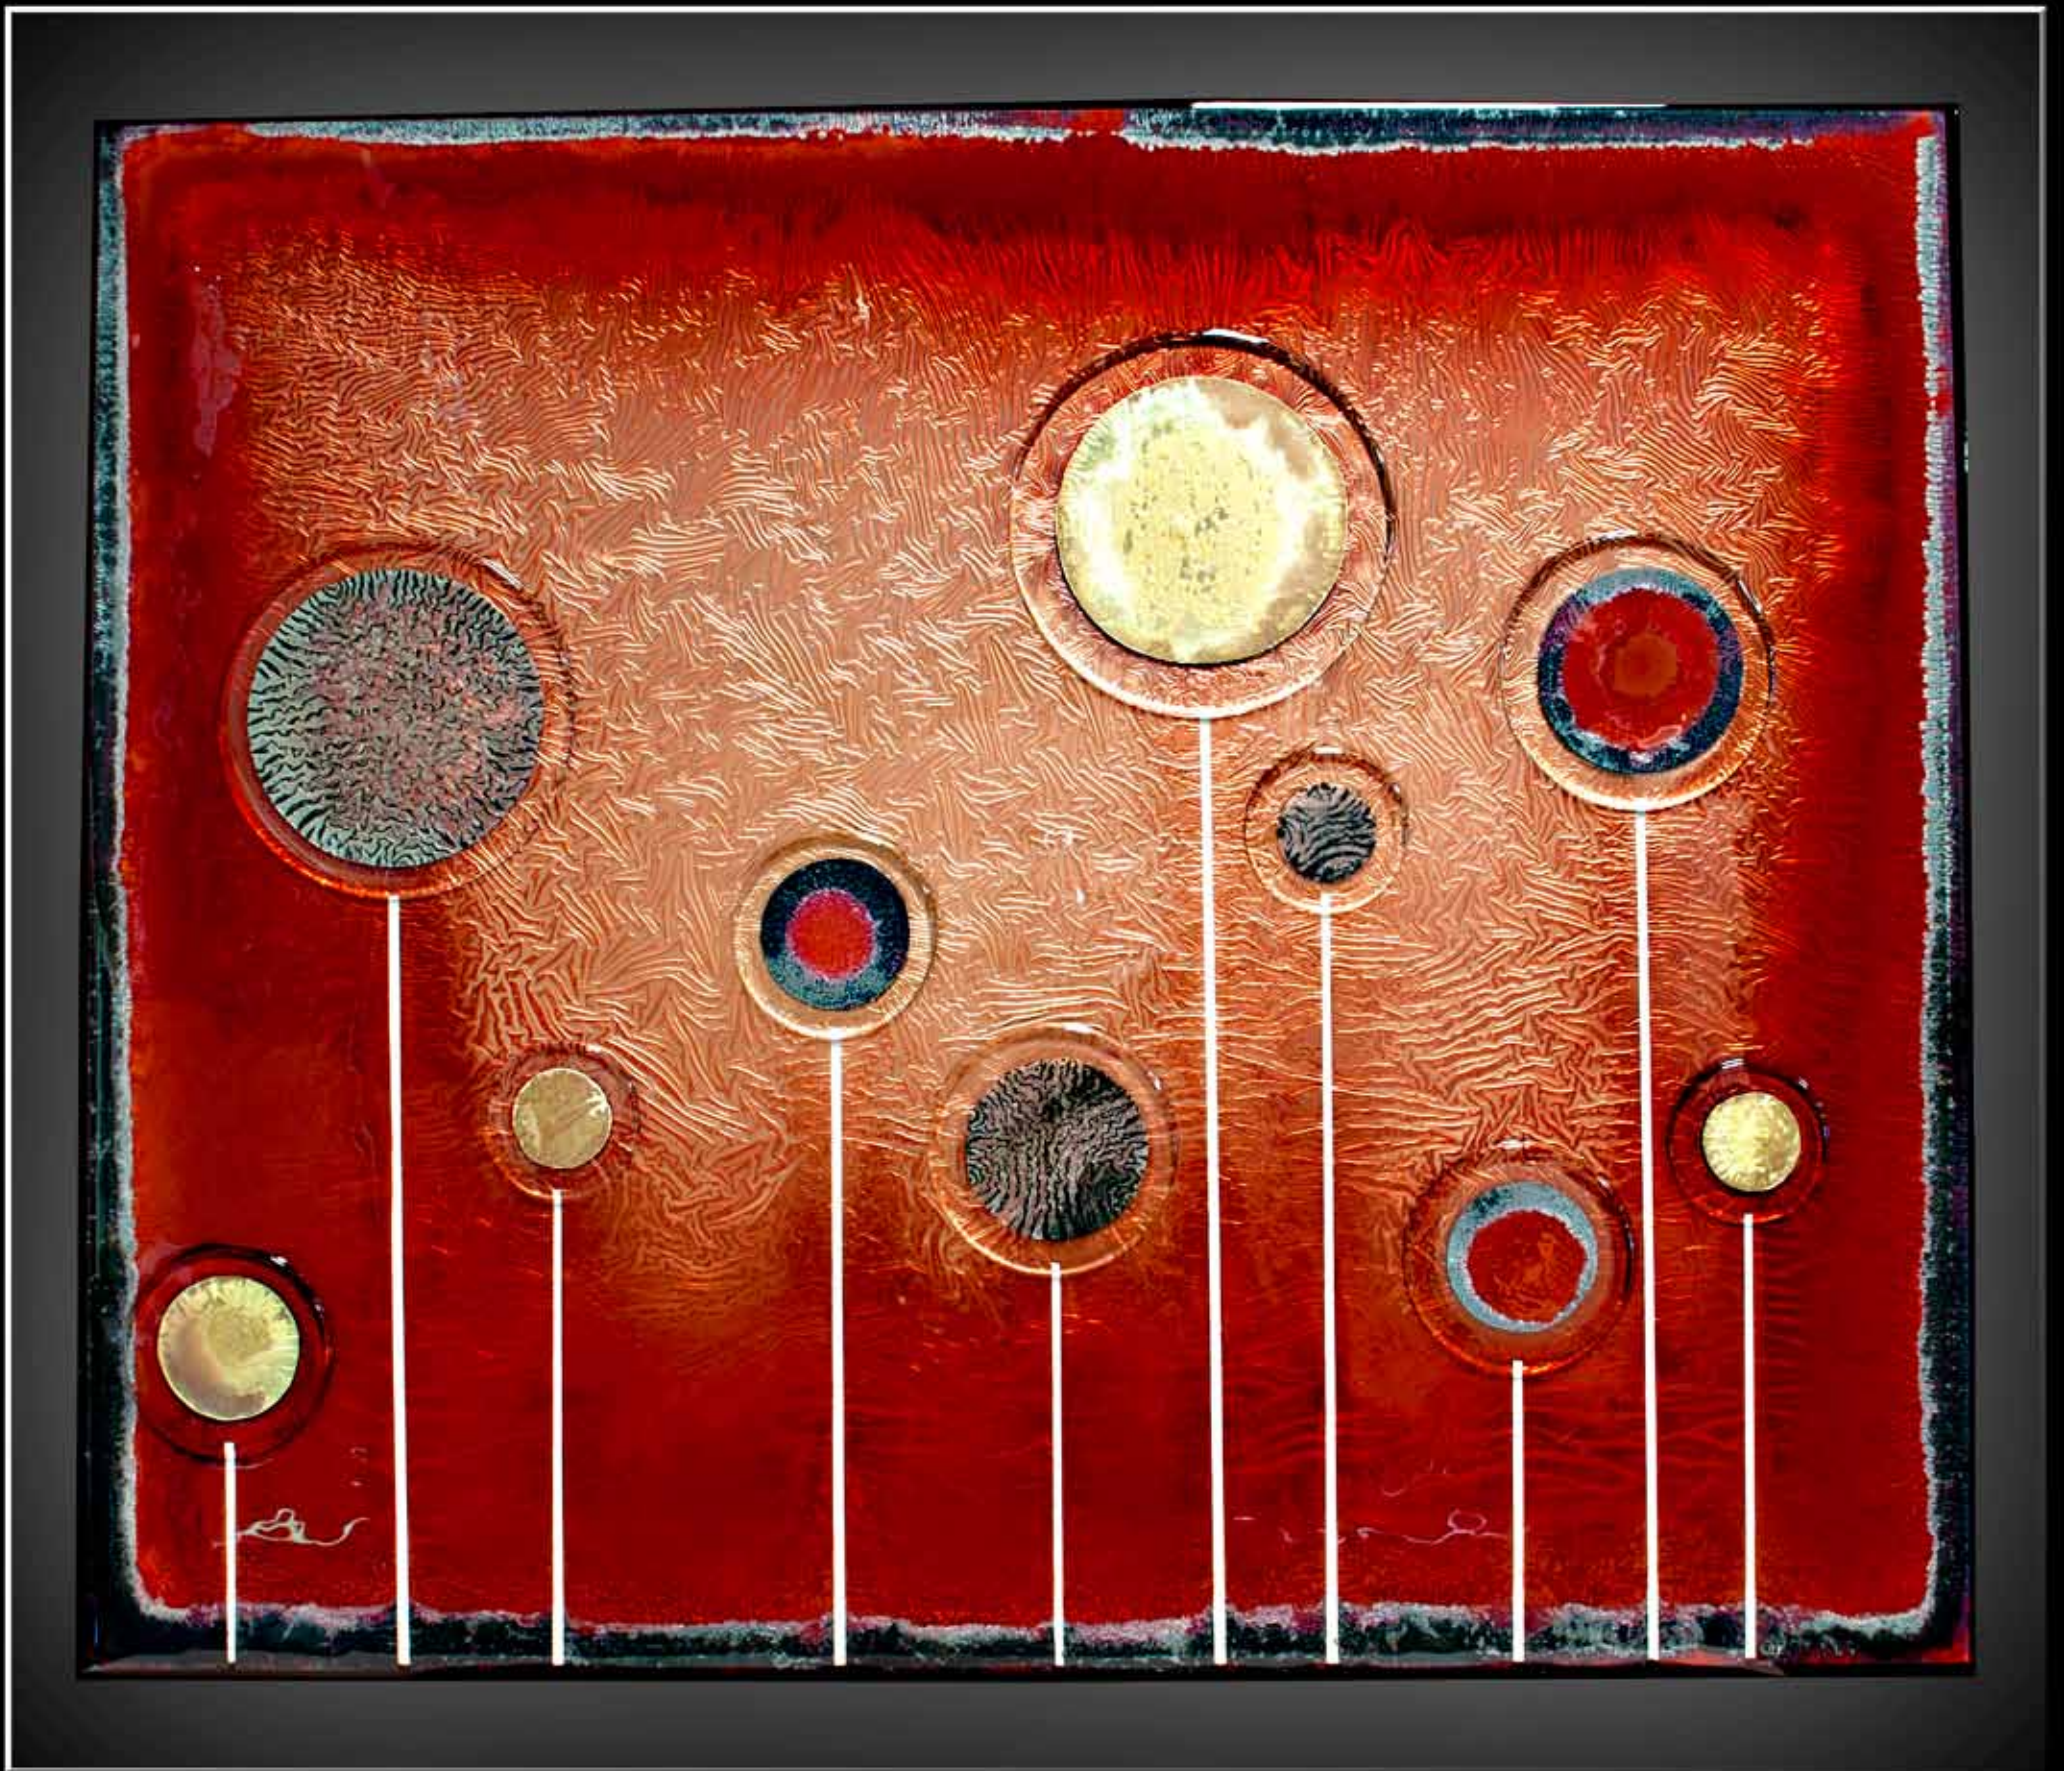

# CRÉDENCES

Ne craignant pas la chaleur,  
ce procédé permet la réalisation de crédences de cuisine,  
en standard ou sur mesure.

# ESPACE BAIN

Le métal étant emprisonné dans la masse vitreuse,

les volumes sont insensibles à l'eau

et permettent

la réalisation de panneaux de douche

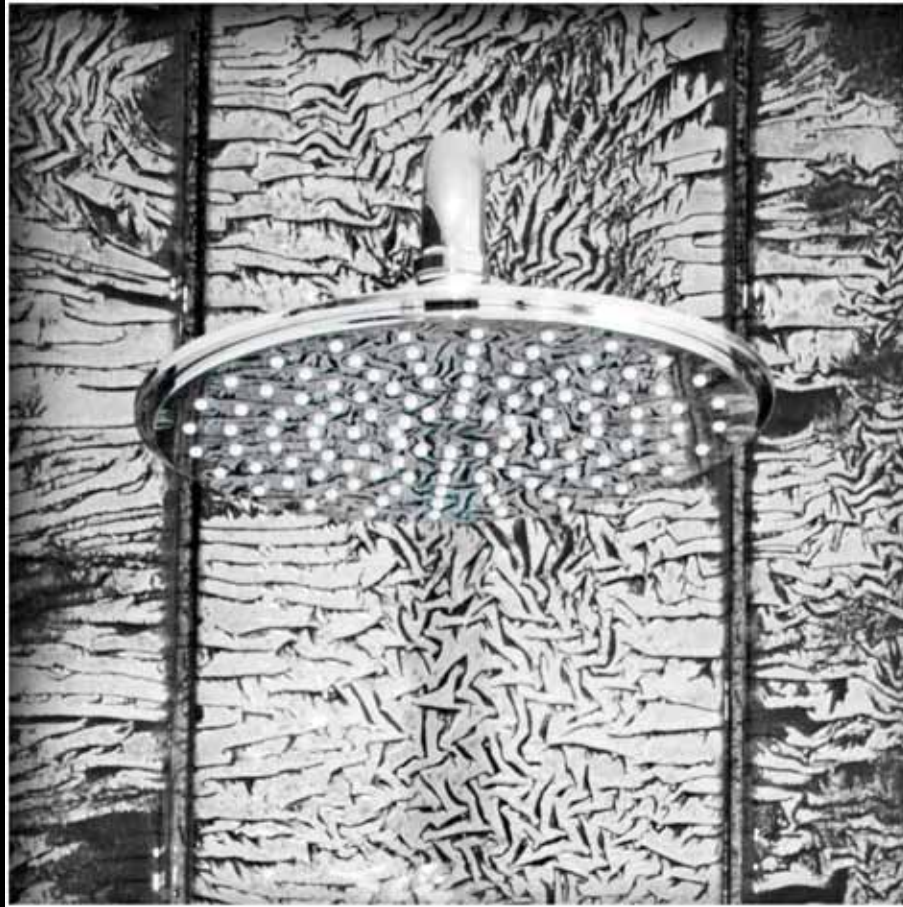

# CARRELAGE

Grâce à une fusion maîtrisée,  
le verre ne craint ni chocs, ni rayures  
et peut être posé en carrelage  
au sol ou mural

MIROIRS

& MOBILIER

L'imagination combinée à la technique

vous permettra de

créer votre intérieur personnalisé
